

UPDATES & ERRATA

Interface Project

Page 3, Steps 8–9

In the May 2024 release of Dreamweaver (21.4), the Sync Settings options have been removed. If you are using this current version, you will not see a message about syncing settings, so Steps 8–9 are unnecessary.

Project 8

Pages 365–374

As of the May 2024 release, the Creative Cloud Adobe Font technology no longer functions properly or reliably in Dreamweaver. Because Dreamweaver is considered to be in “maintenance mode,” we cannot expect to see this problem corrected.

You can simply skip Stage 3 of this project and continue to Stage 4. Your files will look slightly different than what you see in our screen shots, but the functionality in Stages 4 and 5 will work in the same manner.
