

# UPDATES & ERRATA

## Interface Project

---

### Page 4, Step 11

On Macintosh, preferences are now accessed in the Photoshop>Settings submenu. (According to Adobe, in December 2022, Apple dictated that the word “Preference” may not be used in any application menus.)

This change does not affect Windows users.

Step 11 should read:

### 11. Macintosh users: Choose Photoshop>**Settings**>Interface.
