

UPDATES & ERRATA

Project 2

Page 82, Step 5

If you do not see the Properties panel as shown in the screen shot on Page 82, choose Window>Workspace>Reset Select and Mask.

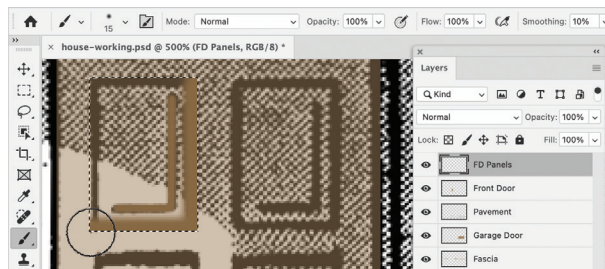

Project 7

Page 440, Steps 6–7

The steps and accompanying images incorrectly identify the edges to be painted. The steps should read:

- Using the same technique, paint a stroke at the **bottom** edge of the panel.

- Change the foreground color to **Doors Highlight**, and reduce the brush size to **10 px**. Paint the **top** and **left** edges of the panel.
