ABOUT AGAINST THE CLOCK

Against The Clock, long recognized as one of the nation's leaders in courseware development, has been publishing high-quality educational materials for the graphic and computer arts industries since 1990. The company has developed a solid and widely-respected approach to teaching people how to effectively utilize graphics applications, while maintaining a disciplined approach to real-world problems.

Having developed the *Against The Clock* and the *Essentials* for *Design* series with Prentice Hall/Pearson Education, ATC drew from years of professional experience and instructor feedback to develop *The Professional Portfolio Series*, focusing on the Adobe Creative Suite. These books feature step-by-step explanations, detailed foundational information, and advice and tips from industry professionals that offer practical solutions to technical issues.

Against The Clock works closely with all major software developers to create learning solutions that fulfill both the requirements of instructors and the needs of students. Thousands of graphic arts professionals — designers, illustrators, imaging specialists, prepress experts, and production managers — began their educations with Against The Clock training books. These professionals studied at Baker College, Nossi College of Art, Virginia Tech, Appalachian State University, Keiser College, University of South Carolina, Gress Graphic Arts Institute, Hagerstown Community College, Kean University, Southern Polytechnic State University, and many other educational institutions.

ABOUT THE AUTHOR

Erika Kendra holds a BA in History and a BA in English Literature from the University of Pittsburgh. She began her career in the graphic communications industry as an editor at Graphic Arts Technical Foundation before moving to Los Angeles in 2000. Erika is the author or co-author of more than thirty books about Adobe graphic design software. She has also written several books about graphic design concepts such as color reproduction and preflighting, and dozens of articles for online and print journals in the graphics industry. Working with Against The Clock for more than thirteen years, Erika was a key partner in developing *The Professional Portfolio Series* of software training books.

CONTRIBUTING AUTHORS, ARTISTS, AND EDITORS

A big thank you to the people whose artwork, comments, and expertise contributed to the success of these books:

- Chris Barnes, Wilson Community College
- Olwen Bruce, Creative Backup LLC
- **Debbie Davidson,** Against The Clock, Inc.
- Charlie Essers, photographer, Lancaster, Calif.
- Matthew Guanciale, Fanboy Photo
- Chana Messer, Artist, Designer, Adobe Software Evangelist Adobe, ACE/ACI
- Beth Rogers, Nossi College Of Art
- Richard Schrand, Corporate Education Professional
- Joseph A. Staudenbaur, Dakota State University

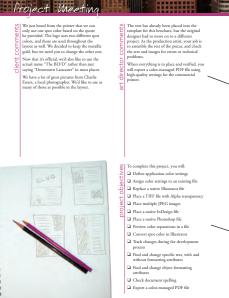

Finally, thanks to **Angelina Kendra**, editor, and **Liz Bleau**, copy editor, for making sure that we all said what we meant to say.

Walk-Through

Project Goals

Each project begins with a clear description of the overall concepts that are explained in the project; these goals closely match the different "stages" of the project workflow.

The Project Meeting

Each project includes the client's initial comments, which provide valuable information about the job. The Project Art Director, a vital part of any design workflow, also provides fundamental advice and production requirements.

Project Objectives

Each Project Meeting includes a summary of the specific skills required to complete the project.

Stage 3 Fine-tuning Text

- 3. Open the Track Changes pane of the Preferences dialog box
- 4. Make sure the Include Deleted Text Wehn Spellchecking option is checked at the bottom of the dialog box.

 It is very casy to make a mistake when spellchecking, so it's a good idea to keep this mages as hereby.
- nowe v Muerinic in use Auneu (Ext enserang menu-16 Marking options add a visual indicator (strikechrosoft), underlining, or outlining, 1911 can more easily identify text that is affected by the Track Changes function.

Real-World Workflow

Projects are broken into logical lessons or "stages" of the workflow. Brief introductions at the beginning of each stage provide vital foundational material required to complete the task.

PLACE A NATIVE INDESIGN FILE 2. Choose File>Place, and select the file invitation.indd. 3. Make sure Show Import Options is checked, then click Oper In the General tab of the Place InDesign Document dialog box, che Bleed Bounding Box in the Crop To menu. 5. Click the Layers button at the top of the dialog box.

Project 10: Combined Brochure

Step-By-Step Exercises Every stage of the workflow is

broken into multiple hands-on, step-by-step exercises.

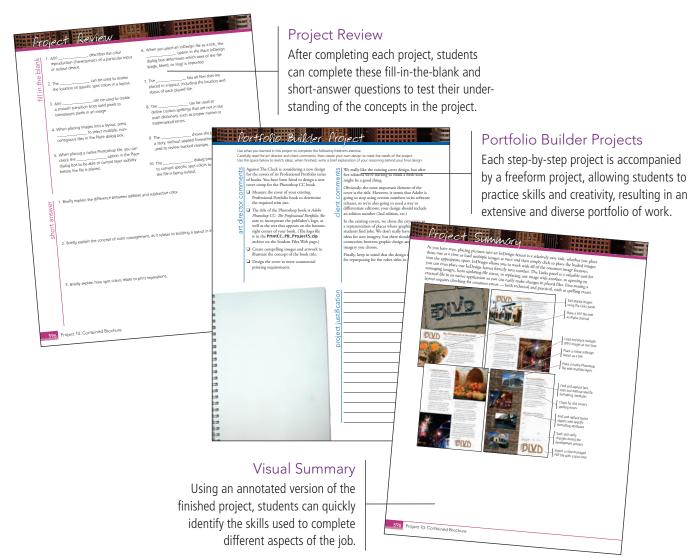

Visual Explanations

Wherever possible, screen shots are annotated so that students can quickly identify important information.

Advice and Warnings Where appropriate, sidebars provide shortcuts, warnings, or tips about the topic at hand.

BIVD

The Against The Clock Portfolio Series teaches graphic design software tools and techniques entirely within the framework of real-world projects; we introduce and explain skills where they would naturally fall into a real project workflow.

The project-based approach in *The Professional* Portfolio Series allows you to get in depth with the software beginning in Project 1 — you don't have to read several chapters of introductory material before you can start creating finished artwork.

Our approach also prevents "topic tedium" — in other words, we don't require you to read pages and pages of information about text (for example); instead, we explain text tools and options as part of a larger project.

Clear, easy-to-read, step-by-step instructions walk you through every phase of each job, from creating a new file to saving the finished piece. Wherever logical, we also offer practical advice and tips about underlying concepts and graphic design practices that will benefit you as you enter the job market.

The projects in this book reflect a range of different types of print design jobs using Adobe Illustrator, Photoshop, and InDesign. When you finish the ten projects in this book (and the accompanying Portfolio Builder exercises), you will have a solid foundational knowledge of the three most popular applications in the print design market — and have a substantial body of work that should impress any potential employer.

Getting Started

Prerequisites

The Professional Portfolio Series is based on the assumption that you have a basic understanding of how to use your computer. You should know how to use your mouse to point and click, as well as how to drag items around the screen. You should be able to resize and arrange windows on your desktop to maximize your available space. You should know how to access drop-down menus, and understand how check boxes and radio buttons work. It also doesn't hurt to have a good understanding of how your operating system organizes files and folders, and how to navigate your way around them. If you're familiar with these fundamental skills, then you know all that's necessary to use the Portfolio Series.

RESOURCE FILES

All the files you need to complete the projects in this book — except, of course, the Adobe application files — are on the Student Files Web page at against the clock.com. See the inside back cover of this book for access information.

Each archive (ZIP) file is named according to the related project (e.g., **Symbols_Print14_RF.zip**). At the beginning of each project, you must download the archive file for that project and expand that archive to access the resource files that you need to complete the exercises. Detailed instructions for this process are included in the Interface chapter.

Files required for the related Portfolio Builder exercises at the end of each project are also available on the Student Files Web page; these archives are also named by project (e.g., **Airborne_Print14_PB.zip**).

ATC Fonts

You must download and install the ATC fonts from the Student Files Web page to ensure that your exercises and projects will work as described in the book. Specific instructions for installing fonts are provided in the documentation that came with your computer. You should replace older (pre-2013) ATC fonts with the ones on the Student Files Web page.

SYSTEM REQUIREMENTS

The Professional Portfolio Series was designed to work on both Macintosh or Windows computers; where differences exist from one platform to another, we include specific instructions relative to each platform. One issue that remains different from Macintosh to Windows is the use of different modifier keys (Control, Shift, etc.) to accomplish the same task. When we present key commands, we always follow the same Macintosh/Windows format — Macintosh keys are listed first, then a slash, followed by the Windows key commands.

SOFTWARE VERSIONS

This book was written and tested using the initial versions of the 2014 release of Adobe Creative Cloud (CC) software, as released in July 2014:

- Adobe InDesign 10.0
- Adobe Photoshop 2014.0
- Adobe Illustrator 18.0

(You can find the specific version number of your applications in the Splash Screen that appears while an application is launching.)

Because Adobe has announced periodic upgrades rather than releasing new full versions, some features and functionality might have changed since publication. Please check the Errata section of the Against The Clock Web site for any significant issues that might have arisen from these periodic upgrades.
