ABOUT AGAINST THE CLOCK

Against The Clock has been publishing computer arts educational materials for more than 15 years, starting out as a Tampa, Florida-based systems integration firm whose primary focus was on skills development in high-volume, demanding commercial environments. Among the company's clients were LL Bean, The New England Journal of Medicine, the Smithsonian, and many others. Over the years, Against The Clock has developed a solid and widely-respected approach to teaching people how to effectively utilize graphics applications while maintaining a disciplined approach to real-world problems.

Against The Clock has been recognized as one of the nation's leaders in courseware development. Having developed the *Against The Clock* and the *Essentials for Design* series with Prentice Hall/Pearson Education, the firm works closely with all major software developers to ensure timely release of educational products aimed at new version releases.

ABOUT THE AUTHORS

Erika Kendra holds a BA in History and a BA in English Literature from the University of Pittsburgh. She began her career in the graphic communications industry as an editor at Graphic Arts Technical Foundation before moving to Los Angeles in 2000. Erika is the author or co-author of more than fifteen books about graphic design software, including QuarkXPress, Adobe Photoshop, Adobe InDesign, and Adobe PageMaker. She has also written several books about graphic design concepts such as color reproduction and preflighting, and dozens of articles for online and print journals in the graphics industry. Working with Against The Clock for more than seven years, Erika was a key partner in developing the new Portfolio Series of software training books.

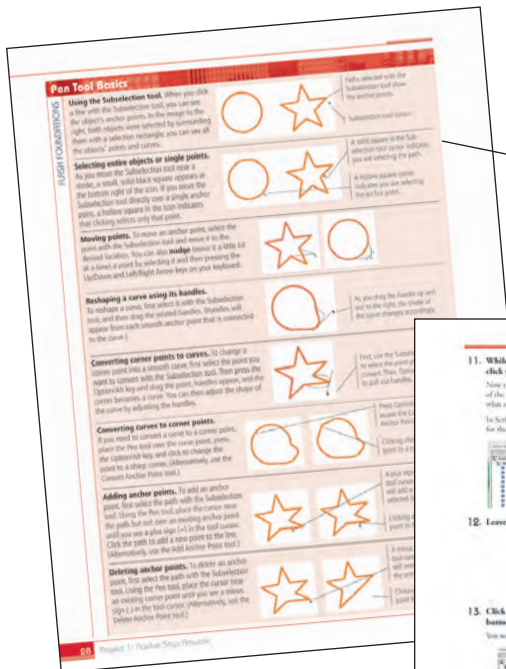

Gary Poysick, co-owner of Against The Clock, is a well-known and often controversial speaker, writer, and industry consultant who has been involved in professional graphics and communications for more than twenty years. He wrote the highly popular *Workflow Reengineering* (Adobe Press), *Teams and the Graphic Arts Service Provider* (Prentice Hall), *Creative Techniques: Adobe Illustrator*, and *Creative Techniques: Adobe Photoshop* (Hayden Books), and was the author or co-author of many application-specific training books from Against The Clock.

CONTRIBUTING AUTHORS, ARTISTS, AND EDITORS

A big thank you to the people whose comments and expertise contributed to the success of these books:

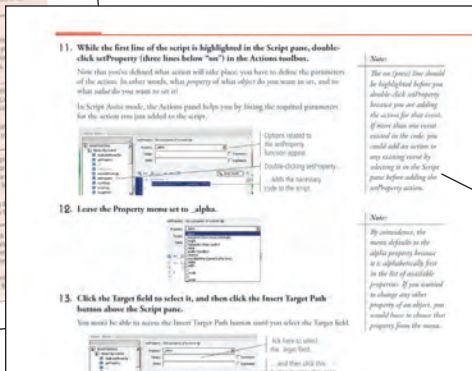

- **Sharon Neville**, Technical Communications Consultants
- **Kara Hardin**, Pensacola Community College
- **Janet Frick**, Training Resources LLC
- **Dean Bagley**, Against The Clock, Inc.
- **Debbie Davidson**, Sweet Dreams Designs
- **Feroz Hassan** and **Sudha Iyer**, Teqnum Consultancy Services

Thanks also to Laurel Nelson-Cucchiara, editor, and Angelina Kendra, proofreader, for their help in making sure that we all said what we meant to say.

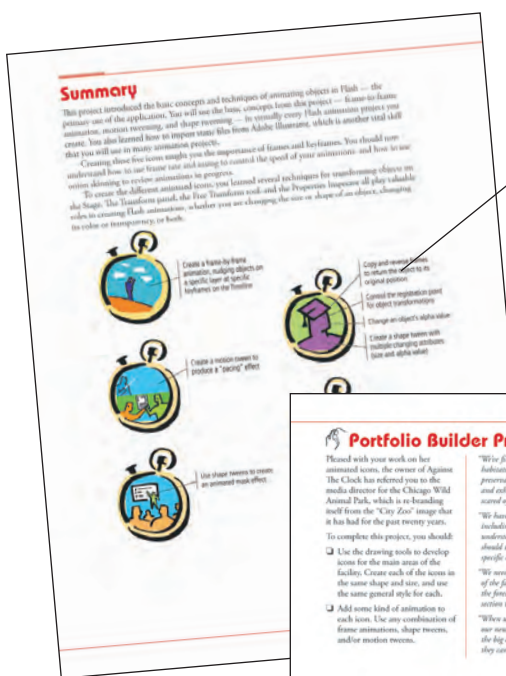

FLASH FOUNDATIONS

Additional functionality, related tools, and underlying graphic design concepts are included throughout the book.

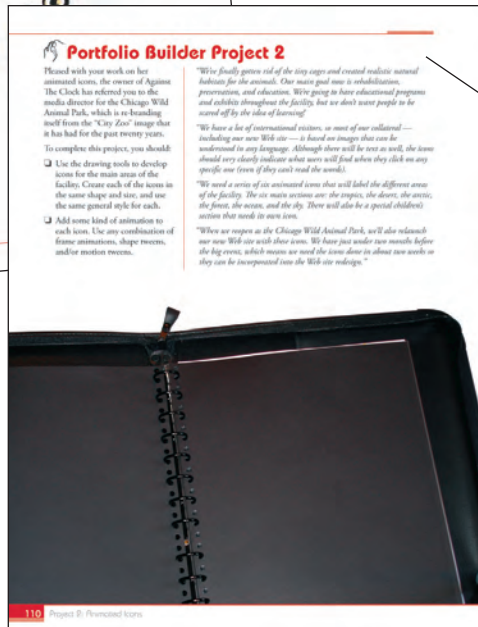

ADVICE AND WARNINGS

Where appropriate, sidebars provide shortcuts, warnings, or tips about the topic at hand.

VISUAL SUMMARY

Using an annotated version of the finished project, students can quickly identify the skills used to complete different aspects of the job.

PORTFOLIO BUILDER PROJECTS

Each step-by-step project is accompanied by a related freeform project, allowing students to practice their skills and exercise creativity, resulting in an extensive and diverse portfolio of work.

Projects at a Glance

The *Against The Clock Portfolio Series* teaches graphic design software tools and techniques entirely within the framework of real-world projects; we introduce and explain skills where they would naturally fall into a real project workflow. For example, rather than providing an entire chapter about publishing files (which most students find boring), we teach publishing where you naturally need to do so — when you complete an animated project.

The project-based approach in the *Portfolio Series* allows you to get in depth with the software beginning in Project 1 — you don't have to read several chapters of introductory material before you can start creating finished artwork.

The project-based approach of the *Portfolio Series* also prevents “topic tedium” — in other words, we don't require you to read pages and pages of information about text (for example); instead, we explain text tools and options as parts of a larger project (in this case, as static text in a solar system model and as dynamic text in a video playback module).

Clear, easy-to-read, step-by-step instructions walk you through every phase of each job, from creating a new file to saving the finished piece. Wherever logical, we also offer practical advice and tips about underlying concepts and graphic design practices that will benefit students as they enter the job market.

The projects in this book reflect a range of different types of Flash jobs, from animating a series of icons to building a model of the solar system to programming an interactive game. When you finish the eight projects in this book (and the accompanying Portfolio Builder exercises), you will have a substantial body of work that should impress any potential employer.

The eight Flash CS3 projects are described briefly here; more detail is provided in the full table of contents (beginning on Page viii).

Project 1 *Rocket Ship Artwork*

- Setting Up the Workspace
- Using Layers to Develop Artwork
- Drawing in Flash
- Painting and Coloring
- Using Gradients

Project 2 *Animated Icons*

- Creating Frame Animations
- Creating Motion Tweens
- Creating Shape Tweens
- Animating Scale and Transparency

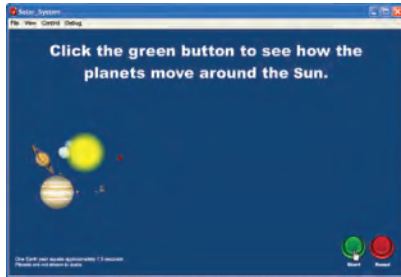

Project 3 *Interactive Park Map*

- Creating Symbols
- Creating Buttons
- Creating Movie Clips
- Programming with ActionScript

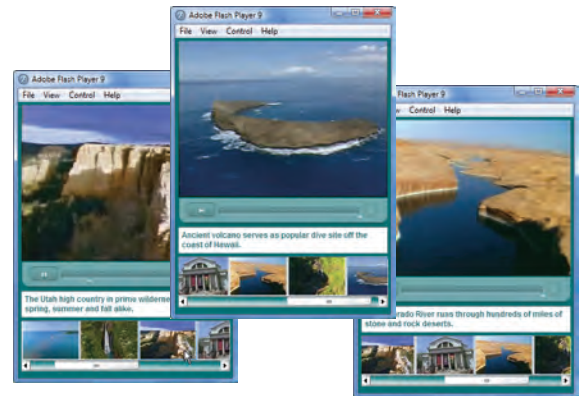

Project 4 *Solar System Model*

- ❑ Modeling Complex Animations
- ❑ Aligning Objects to a Path
- ❑ Working with Text
- ❑ Adding Movie Controls

Project 7 *Travel Video Module*

- ❑ Encoding Video for Flash
- ❑ Working with Components

Project 5 *Gator Race Game*

- ❑ Preparing for ActionScript
- ❑ Working with ActionScript 3
- ❑ Creating Event Handlers and Functions
- ❑ Working with Variables and Arrays
- ❑ Scripting Loops
- ❑ Adding Sound with ActionScript

Project 8 *Seabreeze Web Site*

- ❑ Building Site Navigation
- ❑ Loading External Content

Project 6 *Talking Kid Site Intro*

- ❑ Importing Sound into Flash
- ❑ Synchronizing Sound to Animation
- ❑ Integrating ActionScript

Some experts claim that most people use only a fraction — maybe 10% — of their software's capabilities; this is likely because many people don't know what is available. As you complete the projects in this book, our goal is to familiarize you with the entire tool set so you can be more productive and more marketable in your career as a graphic designer.

It is important to keep in mind that Flash is an extremely versatile and powerful application. The sheer volume of available tools, panels, and features can seem intimidating when you first look at the software interface. Most of these tools, however, are fairly simple to use with a bit of background information and a little practice.

Wherever necessary, we explain the underlying concepts and terms that are required for understanding the software. We're confident that these projects provide the practice you need to create sophisticated artwork by the end of the very first project.

ACKNOWLEDGEMENTS	III
WALK-THROUGH	IV
PROJECTS AT A GLANCE	VI
GETTING STARTED	XIV
THE FLASH CS3 USER INTERFACE	1
<i>The Flash Workspace</i>	1
<i>Menus</i>	2
<i>The Timeline</i>	2
<i>Tools</i>	3
<i>Tool Shortcuts</i>	3
<i>Panels</i>	4
<i>Customizing the Workspace</i>	5
PROJECT 1 ROCKET SHIP ARTWORK	7
Stage 1 Setting Up the Workspace	9
<i>Create a New Document</i>	9
<i>Import Objects from Other Programs</i>	10
<i>Change Document Properties</i>	11
<i>Bitmap Images and Vector Art</i>	11
<i>Align Objects</i>	12
<i>Aligning Objects to Each Other</i>	13
Stage 2 Using Layers to Develop Artwork	14
<i>Create Layers for Organizing Artwork</i>	14
<i>Expanding and Reducing the Timeline</i>	16
<i>Organize Layers into Folders</i>	16
Stage 3 Drawing in Flash	17
<i>Destructive vs. Non-Destructive Interactions</i>	19
<i>Use the Oval Tool to Create Shapes</i>	20
<i>Work with the Line Tool</i>	23
<i>Draw with the Pen Tool</i>	25
<i>Pen Tool Basics</i>	28
<i>Work with Anchor Points and Curves</i>	29
<i>Use Groups to Control the Interaction Between Flash Objects</i>	32
<i>Use the Pencil Tool</i>	35
<i>Drawing Preferences</i>	37
<i>Cut, Copy, Paste, and Paste in Place</i>	38
<i>Use Strokes to Create Complete Objects</i>	41
<i>Editing Line Properties</i>	43
<i>Using Rulers, Guides, and Grids</i>	44
<i>Convert Strokes to Fills</i>	45

Stage 4	Painting and Coloring	46
	<i>Fill Artwork with the Paint Bucket Tool</i>	46
	<i>Change Stroke Colors with the Ink Bottle Tool</i>	47
	<i>Use the Eyedropper Tool</i>	49
	<i>Using Outline View</i>	52
	<i>Use the Brush Tool</i>	52
	<i>Brush Tool Options</i>	54
	<i>Add Backgrounds</i>	55
	<i>Softening the Edges of Fills</i>	56
Stage 5	Using Gradients	57
	<i>Apply a Standard Gradient to Selected Objects</i>	57
	<i>Change the Direction of a Gradient</i>	59
	<i>Use Radial and Custom Gradients</i>	62
	Portfolio Builder Project 1	65

PROJECT 2 ANIMATED ICONS **67**

Stage 1	Creating Frame Animations	69
	<i>Add Frames to Control the Length of an Animation</i>	71
	<i>Add Keyframes</i>	74
	<i>Use Keyframes to Control Timing</i>	76
	<i>Export Image, Export Movie, or Publish?</i>	78
	<i>Export a Movie File for the Web</i>	78
	<i>Understanding Flash Player Export Options</i>	79
	<i>Exporting File Types</i>	80
Stage 2	Creating Motion Tweens	81
	<i>Prepare Artwork for a Motion Tween</i>	82
	<i>Create Mid-Animation Keyframes</i>	83
	<i>Mix Tweens and Frame Animations</i>	84
	<i>Transformations in the Modify Menu</i>	86
	<i>Use Onion Skins</i>	87
	<i>Use the Ease Command to Control Timing</i>	89
	<i>Using Skinning and Easing Together</i>	91
Stage 3	Creating Shape Tweens	92
	<i>Add Layers for Tweened Objects</i>	92
	<i>Animate Shape Changes</i>	93
	<i>Free Transformations</i>	96
	<i>Combine Keyframes and Shape Tweens</i>	96
Stage 4	Animating Scale and Transparency	98
	<i>Prepare the Artwork for Animation</i>	98
	<i>Scale an Object with a Shape Tween</i>	99
	<i>Using the Transform Panel</i>	101
	<i>Change Alpha Values Using a Shape Tween</i>	102
	<i>Animate Multiple Objects</i>	104
	<i>Shape Hinting</i>	105
	<i>Create Multiple Tweens at Once</i>	107
	Portfolio Builder Project 2	110

Stage 1	Creating Symbols	113
	<i>Creating New Symbols</i>	114
	<i>Import Symbols into a Library</i>	115
	<i>Create a New Symbol from Scratch</i>	116
	<i>Modify Existing Symbols</i>	118
	<i>Drag a Symbol from One Movie to Another</i>	120
	<i>Create Library Folders to Organize Symbols</i>	121
	<i>Creating Content for the Phone</i>	122
	<i>Import Symbols from External Libraries</i>	123
	<i>Align Symbols on Their Own Stages</i>	124
	<i>Use Existing Symbols to Create New Ones</i>	125
Stage 2	Creating Buttons	127
	<i>Place Button Instances</i>	127
	<i>Swap Symbols</i>	129
	<i>Create a Button</i>	130
	<i>Use Hit States</i>	133
	<i>Edit Multiple Symbols</i>	134
Stage 3	Creating Movie Clips	136
	<i>Create a Movie Clip Symbol</i>	136
	<i>Modifying and Animating Instances</i>	137
	<i>Using Different Editing Modes</i>	138
	<i>Convert the Remaining Icons into Movie Clips</i>	139
	<i>Create Named Instances</i>	142
	<i>Viewing Use Counts</i>	144
	<i>Planning Your Script</i>	146
Stage 4	Programming with ActionScript	146
	<i>Program a Button Behavior with Script Assistance</i>	147
	<i>Using the Actions Panel</i>	150
	<i>Program Button Behavior Manually</i>	153
	Portfolio Builder Project 3	158

Stage 1	Modeling Complex Animations	161
	<i>Create the Basic Document</i>	161
	<i>Use Transparency to Blend Objects into the Background</i>	162
	<i>Import and Mask Planet Images</i>	164
	<i>Controlling Frame and Tween Properties</i>	169
Stage 2	Aligning Objects to a Path	170
	<i>Create the Solar System Structure</i>	170
	<i>Create Motion Paths to Animate Planets' Orbits</i>	173
	<i>Why Movie Clips?</i>	174
	<i>Viewing Large Documents</i>	177

	<i>Extending the Length of the Timeline</i>	178
	<i>Complete the Planets' Orbits</i>	178
	<i>Organize the Library</i>	179
	<i>Animate a Nested Movie Clip</i>	180
Stage 3	Working with Text	183
	<i>Controlling Text Properties</i>	184
	<i>Add Static Text to the Model</i>	185
Stage 4	Adding Movie Controls	188
	<i>Prepare Instances for Button Control</i>	188
	<i>Add Start and Stop Buttons</i>	189
	<i>Assign Behaviors to Button Instances</i>	191
	Portfolio Builder Project 4	196

PROJECT 5 GATOR RACE GAME 197

Stage 1	Preparing for ActionScript	199
	<i>Review the File Structure</i>	199
	<i>Define Instance Names</i>	202
	<i>Add Motion to the Background</i>	203
	<i>Move the Starter Off the Stage</i>	205
Stage 2	Working with ActionScript 3	206
	<i>Use Functions to Control Movie Clip Timelines</i>	207
	<i>Getting Help in the Actions Panel</i>	208
	<i>Use Functions to Loop Frame Animations</i>	211
	<i>Use Scripting to Control Object Properties</i>	215
Stage 3	Creating Event Handlers and Functions	218
	<i>Create an Event Listener</i>	219
	<i>Define a Custom Function</i>	220
Stage 4	Working with Variables and Arrays	224
	<i>Script with Variables and Random Numbers</i>	224
	<i>Translating ActionScript to Plain English</i>	228
	<i>Create an Array to Store Racer Positions</i>	228
Stage 5	Scripting Loops	230
	<i>Define a for...in Loop to Evaluate Array Elements</i>	232
	<i>Use an if else Condition to Call Movie Clip Frames</i>	235
	<i>Translating ActionScript to Plain English, Part 2</i>	235
	<i>Program the Restart Button Functionality</i>	239
	<i>Test the Movie and Change Cursor Styles</i>	242
Stage 6	Adding Sound with ActionScript	244
	<i>Create Access to Sound Files in the Library</i>	244
	<i>Create Scripts to Call Sounds</i>	246
	Portfolio Builder Project 5	251

PROJECT 6 TALKING KID SITE INTRO 253

Stage 1 Importing Sound into Flash 255

Import Sound Files 255

Add Event Sound 257

Use the Start and Stop Sync Methods for Buttons 259

Add Streaming Sound 261

Play the Movie on the Stage 262

Edit a Sound Envelope to Control Volume 264

Edit a Sound Envelope to Control Duration 266

Applying Built-In Sound Effects 267

Stage 2 Synchronizing Sound to Animation 268

Prepare for Lip Syncing 269

Sync Graphics and Sound 270

Stage 3 Integrating ActionScript 275

Create Preloader Objects 275

Program a Preloader Script 277

Test the Preloader 280

Add ActionScript Movie Controls 281

Define Sound Compression Settings 283

Export the Final Movie 286

Portfolio Builder Project 6 288

PROJECT 7 TRAVEL VIDEO MODULE 289

Stage 1 Encoding Video for Flash 291

Create a Queue in the Flash Video Encoder 291

Define Encoder Settings 294

Prepare the Container Flash File 297

Import Video into Flash 299

User Interface Components 304

Stage 2 Working with Components 304

Define FLVPlayback Component Parameters 305

Use the TextArea Component for Captions 307

FLVPlayback Component Parameters 307

Add Thumbnail Navigation Objects 309

TextArea Component Parameters 309

Add Content to the TileList Component 311

Adjust TileList Parameters 313

TileList Component Parameters 315

Define a Change Event to Link Thumbnails to Movies and Captions 316

Edit an Interface Component Skin 320

Edit Component Text Styles 323

Text Properties in ActionScript 324

Export the Video Module for Upload 325

Portfolio Builder Project 7 327

Stage 1 Building Site Navigation 331

Add Frame Labels 331

Create Switch Case Navigation 336

Change Dynamic Text Using Switch Cases 338

Create a Dynamic Date Object 341

Stage 2 Loading External Content 344

Define a Loader Object for Image Files 344

Use the addChild Function to Add Objects to the Display List 348

Define a URLLoader Object for an External Text File 352

Create Custom Scroll Buttons 354

Use the UILoader Component for External SWF Files 357

Portfolio Builder Project 8 363

PREREQUISITES

The entire Portfolio Series is based on the assumption that you have a basic understanding of how to use your computer. You should know how to use your mouse to point and click, as well as to drag items around the screen. You should be able to resize and arrange windows on your desktop to maximize your available space. You should know how to access drop-down menus, and understand how check boxes and radio buttons work. It also doesn't hurt to have a good understanding of how your operating system organizes files and folders, and how to navigate your way around them. If you're familiar with these fundamental skills, then you know all that's necessary to use the Portfolio Series.

RESOURCE FILES

All of the files that you need to complete the projects in this book are on the provided Resource CD in the RF_Flash folder. The main RF folder contains eight subfolders, one for each project in the book; you will be directed to the appropriate folder whenever you need to access a specific file. Files required to complete the related Portfolio Builder exercises are in the RF_Builders folder.

The Resource CD also includes a WIP folder, which also contains (mostly empty) subfolders for each project in the book. This is where you will save your work as you complete the various projects. In some cases, the location of a file will be extremely important for later steps in a project to work properly; that's why we've provided a specific set of folders with known file names.

Before you begin working on the projects in this book, you should copy the entire WIP folder to your hard drive or some other recordable media such as a flash drive; when we tell you to save a file, you should save it to the appropriate folder on the drive where you put that WIP folder.

SYSTEM REQUIREMENTS

As software technology continues to mature, the differences in functionality from one platform to another continue to diminish. The Portfolio Series was designed to work on both Macintosh or Windows computers; where differences do exist from one platform to another, we include specific instructions relative to each platform.

One issue that remains different from Macintosh to Windows is the use of different modifier keys (Control, Shift, etc.) to accomplish the same task. When we present key commands, we always follow the same Macintosh/Windows format — Macintosh keys are listed first, then a slash, followed by the Windows key command.

System Requirements for Adobe Flash CS3:

Windows®

- Intel® Pentium 4 or higher or equivalent
- Microsoft® Windows XP with Service Pack 2 or Windows Vista™ Home Premium, Business, Ultimate, or Enterprise
- 512MB of RAM
- 2.5 GB of available hard-disk space
- 1024×768 monitor resolution with 16-bit video card
- DVD-ROM drive
- QuickTime 7.1 required for multimedia features

Mac OS

- PowerPC® G4 or G5 or Intel-based Macintosh
- Mac OS X v.10.4.8
- 512MB of RAM
- 2.5 GB of available hard-disk space
- 1024×768 monitor resolution with 16-bit video card
- DVD-ROM drive
- QuickTime 7.1 required for multimedia features
